Austrian Audio MiCreator Studio

Austrian Audio announces the MiCreator Studio, an ultra-flexible pocket recording system that seamlessly combines a condenser microphone and a USB-C audio interface in a compact, rugged design that lets you record what you want, where you want, and when you want. First and foremost, MiCreator’s microphone maintains the top-notch audio quality that Austrian Audio has become known for. Add to this an audio interface with an additional input for quick-and-easy multi-tracking and optional stereo recording, higher SPL handling than other USB mics on the market, intuitive on-board controls and you have an eye-catching, compact and plug-and-play recording studio in your pocket.

“Many times a quick riff, a scratch vocal, or unplanned content creation is the best performance, so why not capture everything with studio quality sound,” says Martin Seidl, CEO of Austrian Audio. “Whether you’re at home or on the go, MiCreator Studio always keeps Austrian Audio recording quality within reach.”

Bryan Bradley, President of Group One Limited, Austrian Audio’s US distributor, adds: “This is an exciting new direction for Austrian Audio and we’re thrilled to put

this high-quality mic into the hands of musicians, songwriters, and content creators, making it easier for them to record premium audio whenever and wherever they feel inspired.”

Key Features:

- Plug-and-play USB-C microphone and audio interface
- Condenser capsule for top-notch audio quality
- Max SPL: 130 dB
- Input for connecting a second device (MiCreator Satellite, Y-LAV mic, Instrument) - great for interview situations
- Two headphone outputs: Easily collaborate with fellow musician
- Two gain settings and one knob jogwheel for easy volume control
- “FlexTilt” vertical adjustment of the mic head for ideal positioning
- Latency-free direct monitoring of the mic and input while recording
- Rugged metal housing with changeable faceplates for a variety of color combinations and customization
- Austrian Audio Open Acoustic Technology
- Designed and engineered in Vienna, Austria

Prices, Accessories & Bundles:

- MiCreator Studio - MSRP € 199 / $ 199 / £ 179
- MiCreator System Set - MSRP € 299 / $ 299 / £ 269

The ultimate recording toolkit for music and content creation. Record high-quality audio with MiCreator Studio and Satellite microphones. Achieve perfect stereo recordings with the MiniBar stereo bar. Even customize your look with swappable faceplates. And when it’s time to hit the road, keep your set protected with the custom case. It’s everything you need to record how you want, where you want.

- MiCreator Studio
- MiCreator Satellite
- All cables
- 2x face plates for each mic
- MiCreator MiniBar stereo bar
- Custom MiCreator Case

Both MiCreator Studio and MiCreator System Set come with Steinberg Cubase LE digital audio workstation or Wavelab Cast for podcasts and social media. Plus, Cubase LE is unlocked as soon as the MiCreator Studio is connected to an iOs device.

MiCreator Satellite - MSRP € 99 / $ 99 / £ 89

Satellite is a powerful microphone that pairs seamlessly with MiCreator Studio to expand your creative possibilities. Link Satellite and MiCreator Studio via the in/out ports to track two sound sources. Achieve true stereo recordings and capture the energy of the moment.

MiCreator Y-Lav - € 49 / $ 49 / £ 49

Lavalier Microphone with an additional headphone jack. Y-Lav turns your MiCreator Studio into a mobile content creation powerhouse. Record two speakers simultaneously by tethering Y-Lav to your Studio. Hear your audio in realtime thanks to the additional headphone output. Make sure your content sounds as good as it looks with Y-Lav.
