Ambient Boom Cases

As Ambient noticed, boom operators have long been asking for a transport option for their QuickPoles that is as stable and robust as the former BC quivers, while at the same time offering the carrying comfort of a shoulder bag.

Ambient presents: The Ambient Boom Case - with the following features:

- Inside a sturdy tube that withstands even the toughest handling
- Robust fabric coating on the outside
- 3 different lengths available. Sized to fit the QuickPoles including QuickLok and cable outlet
- 70mm inner diameter. Wide enough, so that QuickPoles with side cable outlet also fit in
- Sturdy and adjustable carrying strap
- Inner padding to protect the pole
- Slot-in pocket for business card

Here is an overview which Ambient poles fit which Boom Case. This applies to the boom pole alone as well as including a mounted QuickLok and cable outlet:
