BOOM Library February BOOM ONE Update

BOOM Library has announced the latest expansion of its BOOM ONE collection, adding over 500 new sound files and more than 2,000 individual effects. This month’s update introduces a diverse selection of rolling and spinning object recordings, immersive ambiences from Sri Lanka, and a variety of additional high-quality sound elements. At over 18GB, this release offers sound designers a rich selection of detailed and versatile effects for their creative projects.

This release features over 250 recordings capturing objects rolling, spinning, and rotating across a range of surfaces. From common items like plates, bottles, and marbles to heavier objects such as dumbbells, metal bolts, and cargo boards, these sounds provide the detail and motion needed for realistic sound design.

Key Recordings include:

- Objects: Plates, Glass, Porcelain Lids, Metal Wheels, Coins, Rings, Paint Rollers, Rollerblades
- Surfaces: Ceramic, Concrete, Glass, Metal, Wood

With over 40 detailed ambience recordings, this collection transports listeners to the diverse landscapes of Sri Lanka. From the peaceful highlands and flowing waters to bays, lagoons, and mountain environments, these sounds add depth and authenticity to any project.

Content Highlights:

Phoca PDF

- Highlands
- Bays & Lagoons
- Mountains
- Flowing Waters

In addition to motion and ambience, this release includes over 200 extra files covering a broad range of sound design needs, such as electric tufting gun sounds, footstep Foley, and magical elements.

Total February Collection:

- Over 500 New Files
- Over 2,000 Individual Sounds
- Over 18GB of Content
