BOOM ONE July 2025 Update

BOOM Library has announced the July 2025 update to its acclaimed BOOM ONE collection, delivering over 300 meticulously recorded sound files, 1,000 individual sounds, and more than 34 GB of premium audio content. This latest expansion blends the organic complexity of rainfall with the mechanical precision of professional camera operations, offering sound designers a rich toolkit for crafting authentic, immersive audio experiences. With 160 carefully captured recordings, this segment explores how rain interacts with a wide variety of surfaces. From gentle patter on glass to the force of heavy storms battering metal, these recordings cover multiple perspectives and distances, enabling nuanced design for film, games, and ambient installations.

Content includes:

- Rainfall across concrete, wood, water, glass, plastic, and metal
- Multiple recording distances and perspectives
- Dramatic hail storms and thunderstorms

The update also features 120+ high-resolution recordings of six professional camera bodies, along with detailed captures of a Nikkor zoom lens. From subtle shutter clicks to intricate lens adjustments, these sounds are ideal for film and documentary production, as well as UI and game interface design.

Content includes:

Phoca PDF

- Canon 6D & 1300D
- Nikon D600, D800, D810 & D3000
- Nikkor zoom lens operations
- Comprehensive range of shutters, controls, mechanical clicks, and adjustments

Total July Collection Overview:

- 305 Carefully Organised Files
- 1,000+ Individual Sounds
- 34GB+ of Content

Whether building atmospheric storm sequences or adding the subtle mechanical realism of photographic equipment, this BOOM ONE update equips audio professionals with the authenticity and detail their projects demand.
