BOOM Library BOOM ONE

Boom Library, announces the release of the latest update to its flagship sound effects library, BOOM ONE. Available from August 14th 2024, this update delivers a massive addition of over 600 files, packed with 3,256 meticulously crafted sounds that span more than 8GB of audio content. With this update, BOOM ONE continues to provide the ultimate toolkit for sound designers, offering a diverse range of sounds that push the boundaries of creativity.

The latest BOOM ONE update is all about expanding the possibilities of your sound design. At the heart of this release are 187 designed morph files that defy reality. These sounds are a fusion of abstract, otherworldly textures - ranging from futuristic atmospheres to powerful impacts and dynamic pass-bys. Whether you’re crafting an alien landscape or adding a synthetic twist to a scene, these morphs are designed to take your audio to new dimensions.

For those working on projects that demand intensity, this update includes 88 male combat vocal files that capture the raw energy of battle. From the strain of breathing to the force of an attack and the raw power of a scream, these sounds

bring an unmatched level of realism and power to your combat scenes. Whether it’s a high-octane game or an action-packed film, these combat vocals will immerse your audience in the heart of the action.

This update also features 329 additional files, offering a wide variety of sounds to enhance any project. From the eerie creaks of old wooden doors to the sharp metallic friction and crashes, and even recordings of an antique car, this collection ensures you have the right sound for every moment. The update also includes a broad array of Foley sounds, each one carefully crafted to deliver top-notch quality for your creative needs.

With a total of 604 files, comprising 3,256 sounds and more than 8GB of audio content, this update adds even more value to BOOM ONE. Whether you’re working on a film, game, or any other audio-visual project, this update ensures you have all the resources you need to bring your soundscapes to life.
