Boris FX acquires Vegas Pro, Sound Forge, and Acid Pro

Boris FX announces the acquisition of Vegas Pro (formerly Sony Vegas), Sound Forge (pictured above), and Acid Pro from MAGIX Software GmbH. The acquisition brings new AI technology to Boris FX, along with the notable video editing and audio products. The additions further cement Boris FX’s commitment to provide artists and teams across media & entertainment, content creation, and music & sound industries with top tools that deliver fast, powerful, and unlimited creative possibilities.

“We’re thrilled to add Vegas Pro (formerly Sony Vegas), Sound Forge, and Acid Pro to our product family. We look forward to advancing all three with more power behind them,” states Boris Yamnitsky, President and Founder of Boris FX. “Boris FX has never been a single-host plugin company, and this acquisition strengthens that commitment. We will continue supporting every major platform and host application as we always have, while our combined engineering teams accelerate innovation by bringing shared AI technology across our entire product line.”

The product development teams and engineers behind Vegas Pro, Sound Forge, and Acid Pro, based in Madison, Wisconsin, and Germany, will remain with the organization. “In my nearly 30 years of involvement in the Vegas Pro effort, I've never been more excited about the future of the software than I am right now,” remarks Gary Rebholz, former Vegas Chief Product Officer and current consultant for Boris FX. “The entire team is strong, fully engaged, and committed to taking

Vegas Pro, Sound Forge, and Acid Pro into the future. We're extremely happy with our new home at Boris FX and look forward to working with experts throughout the company to continue bringing loyal customers and new users the best editing and creation software."

Boris FX Vegas Pro is available in three editions - Vegas Pro, Vegas Pro Plus, and Vegas Pro Ultimate. Each tier builds on the core editing platform with additional visual effects plugins and professional audio tools. Vegas Pro and Vegas Pro Plus are available with subscription or perpetual licensing. Vegas Pro Ultimate is available as a subscription plan. The 2026 release introduces major new features across the lineup.

"Vegas Pro 2026 focuses on bringing in the tools and add-ons our users have been asking for, opening up new workflow and creative possibilities with greater stability," notes Florian Liepold, Boris FX Vegas Pro product owner. "As a team of enthusiasts, we see Vegas Pro as a perfect match for the Boris FX portfolio. It's exciting to combine award-winning plugins with our own NLE and really unlock its full potential as we work toward deeper, more seamless integration between Vegas Pro and Boris FX plugins and products."

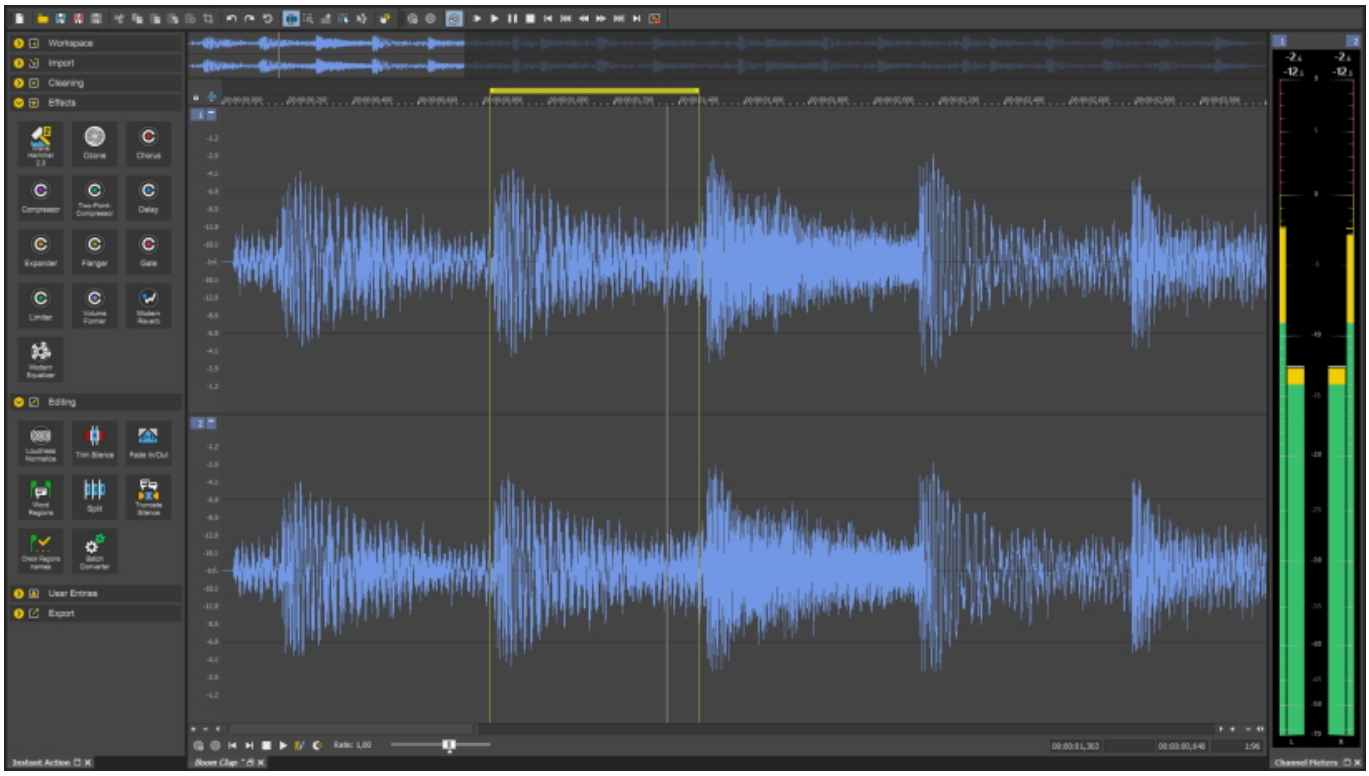

"I've been creating YouTube videos with Vegas Pro since version 7. Of all the evolutions I've seen in the past, Boris FX acquiring it takes the cake," comments Josh Crahen, YouTuber and Boris FX Vegas Pro product specialist. "I already loved using Continuum and Mocha Pro plugins, and now the community will have this opportunity, too, with new integrations and must-have VFX, mograph, and audio add-ons in the 2026 release. I'm pumped for the Vegas Pro community."

Sound Forge and Acid Pro products join Boris FX's Pro Audio division, which also includes Sequoia, Samplitude, CrumplePop, and Music Studio. Each toolset brings unique capabilities for music and audio creators.

In its three decades, Sound Forge has established itself as a comprehensive, high-quality audio recording, editing, sound design, and mastering tool. The specialized, easy-to-learn flow allows users to work on a single audio file. It offers deep customization, precise control, and fast, time-saving background operations. Features include recording up to 32 channels at once, automatic record start, clear second-source audio, restoration tools, quick dialogue editing, applying effects, and visualizing sound with WaveColor.

Sound Forge integrates seamlessly with Vegas Pro or serves as a critical component alongside a user's preferred digital audio workstation (DAW). Sound Forge Plus includes access to 3rd-party applications and plugins, including Celemony Melodyne 5 Essentials, Vandal, VariVerb II, and 3D Reverb.

Acid Pro is the original loop-based music software that lets users easily create songs and beats without prior experience. The simple workflow offers a massive collection of royalty-free loops, automatic pitch and tempo matching, live preview, multitrack recording, editing, and mixing, hit-point markers for tight video sync, and an intuitive timeline arranger.

To celebrate the launch, Boris FX is offering Vegas Pro users complimentary access to the new Vegas Pro Essentials training series, a premium download normally priced at $49.95. The 22-part course includes more than three hours of instruction designed to help creators quickly learn the Vegas Pro workflow. The series is taught by Boris FX product specialist Grant Kay and guides new users through the complete editing process, including project setup, editing techniques, transitions, visual effects, color grading, titles, keyframing, audio adjustments, and final export. The premium download includes all footage, project files, and high-resolution lesson
