2wcom's Multi-Channel Cloud capability added to SmartRadio

Broadcast Partners is happy to announce the successful integration of 2wcom's MoIN, multi-channel cloud software in SmartRadio , the radio industry's leading Cloud Radio Production Service. MoIN will enhance SmartRadio's "Audio Playout as-a-Service" capabilities with encoding and streaming multiple audio channels simultaneously.

"We are very happy to partner with 2wcom to integrate their industry-leading and robust Audio-over-IP solution, which makes our SmartRadio the most open and flexible Radio Production service available on the Cloud today"- Robert-Jan van der Hoeven, CEO of Broadcast Partners

"Being a partner for the past 15 years we are pleased that Broadcast Partners has chosen MoIN software to extend their SmartRadio platform with enhanced streaming and transcoding features. SmartRadio integrates many applications from well-known vendors and we are happy to be part of the platform." - Leif Cipriani, CTO of 2wcom Systems GmbH

Both Broadcast Partners and 2wcom will be exhibiting at the Hamburg Open exhibition on January 19 and 20, 2022. Do not hesitate to visit Broadcast Partners at stand number H.431 and 2wcom Systems GmbH at stand number H.135.
