Ferncast hosts Post-IBC Webinar

Ferncast, a provider of 24/7 software solutions for audio streaming, will host a free post-IBC webinar on September 24th at 10:00 AM CET. Titled "Ferncast Post-IBC Webinar," this event is intended for those who were unable to meet Ferncast at IBC 2024, as well as anyone interested in learning more about the cutting-edge advancements in radio streaming developed by Ferncast. It is another opportunity to learn what Ferncast has presented at the IBC this year.

During the webinar, Ferncast experts will present the newest and upcoming features of aixtream, including:

- AI-Voice Moderation
- Immersive Audio
- Advanced Radio Scheduling
- Next-Generation Loudness Control (ngLC)

Ferncast also announces that its groundbreaking next-generation Loudness Control (ngLC) has been recognized with the prestigious RedTech Award at IBC 2024, honoring innovation and technical excellence. As one of the most advanced loudness normalization and adjustment tools on the market, ngLC ensures seamless audio balancing, delivering a polished and professional sound, even across diverse track types.

Event Details:

- Date: September 24th 2024
- Time: 10:00 AM CET
- Platform: Zoom (Free registration required)
