Ferncast SessionLinkPRO Webinar

Ferncast, a pioneering company in audio logistics specializing in 24/7 radio software solutions, will host a free webinar titled "On-Air Anywhere – Call, Record and Go Live" on 1st July 2025 at 10:00 a.m. CET, in collaboration with SessionLinkPRO.

This event will showcase the full integration of SessionLinkPRO's browser-based communication tools into Ferncast's aixtream software, offering a practical WebRTC-based solution for remote contribution and communication. Attendees will learn how to manage multiple SessionLinkPRO connections directly within aixtream, integrate them into existing broadcast workflows, and maintain the familiar browser-based access for remote participants.

Ferncast experts will demonstrate the technical setup and explain how this integration streamlines remote workflows and increases overall efficiency. Special guest speaker Tim Proegler of SessionLinkPRO will join to highlight the platform's capabilities and the advantages it offers over traditional communication systems, like classical encoders and telephone hybrids. Whether you're a broadcast engineer, studio technician, or audio infrastructure planner, this webinar will offer practical insights into modernizing remote audio workflows with scalable and user-friendly tools.

Registration is free and open now via Zoom. A recording will be sent to all registrants after the event. Ferncast to Host Free Webinar on July 1st: "On-Air Anywhere – Call, Record and Go Live" in collaboration with SessionLinkPRO. Register here for the Webinar.
