Restart for KATHREIN Broadcast

At the beginning of the year, the Rosenheim District Court officially lifted the insolvency proceedings of KATHREIN Broadcast GmbH. At the same Kme, Jörg Lippert and Dr. Hans Liebler assumed joint management of the company. With the formal conclusion of the proceedings, the restructuring process has been completed and the long-term continuation of KATHREIN Broadcast has been secured. Lenbach Capital had already reached an agreement with the insolvency administrator on the acquisition of the company in August and announced in December its intention to also acquire Kathrein Solutions GmbH. This opens up additional potential for both companies.

“The restart of KATHREIN Broadcast sends a strong signal. We see a company with a deep-rooted engineering experKse. Our goal is to ensure long-term stability and sustainable growth. The acquisiKon of Kathrein SoluKons is an ideal complement to our investment in KATHREIN Broadcast,” says Dr. Hans Liebler, shareholder and Managing Director of KATHREIN Broadcast GmbH. Jörg Lippert, Managing Director of KATHREIN Broadcast GmbH, adds: “Our customers repeatedly confirm that reliable antenna technology and local value creaKon are more important than ever.”

Today, KATHREIN Broadcast operates as an independent, financially sound company with a clear strategic focus on broadcast, air traffic control, and antenna systems “Made in Germany.” As one of the last European providers with in-house development and manufacturing capabilities, the company stands for robust, long-lasting antenna technology that performs reliably even under extreme weather and site conditions.

Following the successful completion of several projects in recent months - including the modernization of the Hamburg-Moorfleet transmission tower for Norddeutscher Rundfunk - as well as new developments in FM retrofit solutions, low-power DAB soluKons, and international partnerships, KATHREIN Broadcast enters the new year in a strengthened position.
