sE Electronics V7 ENG

The V7 continues its rise as the go-to dynamic microphone for performers worldwide, and now it expands into a new arena: broadcast. The new V7 ENG features the same reliable DMC7 capsule and built-in shockmount found in the original V7, but with a purpose-built design that accommodates a station or broadcast flag. With its extended handle, optional included external windscreen, and the same rock-solid sound quality artists rely on, the V7 ENG is ready for field reporters, on-camera talent, and any situation where your brand needs to be front and center. The V7 ENG is a dynamic handheld supercardioid microphone built for ENG and EFP workflows. It delivers the proven V7 sound with field-ready durability and broadcast-friendly ergonomics.

Key Features:

- Extended handle designed to fit a broadcast/station flag
- Same DMC7 capsule as the V7 for clear, focused, high-intelligibility audio
- Strong feedback rejection and consistent off-axis response
- Patented internal shockmount for excellent handling noise control
- Rugged all-metal construction with stainless spring-steel grille
- Includes carrying bag for transport and protection
- Includes external windscreen for outdoor and windy environments
