Sound Radix Auto-Align 2.1

Sound Radix, the innovative audio software company, announces the release of Auto-Align 2.1, the latest update to its critically acclaimed phase alignment plugin. This major update, which will be showcased at NAMM 2024 from this Thursday, January 25th, introduces a host of advanced features, significant fixes and enhancements, increased stability, and improved user control.

- At A Glance - New in Version 2.1:
- Improved core algorithm.
- Group Time Alignment can now be toggled, optimising phase correlation without adding delay.
- Track-based Spectral Phase Optimization: Enables track-based spectral phase optimization independently of time alignment.
- Compare different settings easily with four preset locations.
- Export/import alignment settings to streamline workflow across projects.
- Pro Tools ARA2 support coming later this year to the list.

Auto-Align 2.1 revolutionises the way producers and engineers approach phase alignment. With its enhanced core algorithm, the new version offers more precise and efficient alignment. The introduction of Group Time Alignment, a standout feature, allows users to optimise phase correlation across multiple tracks without adding delay, a groundbreaking advancement in audio alignment technology.

Another notable addition is the Track-based Spectral Phase Optimization. This feature enables spectral phase optimization on a track-by-track basis, independent of time alignment, giving users unprecedented control over their audio. Ease of use is a key aspect of Auto-Align 2.1, and this is exemplified in its new preset locations.

Users can now compare different settings with ease, facilitating a more intuitive mixing experience. Additionally, the ability to export and import alignment settings streamlines workflow, allowing for seamless project transitions.

For a detailed overview of all the new features and improvements in Auto-Align 2.1, please visit Sound Radix's Release Notes. This update is available for free to all registered users of Auto-Align 2. For new users, a free 14-day trial is available.

System Requirements:

- Mac: 64bit Intel CPU or Apple silicon chip, 8GB RAM, macOS 10.9 or higher
- Windows: 64 bit Intel or AMD CPU, 8GB RAM, Windows 10 or higher
- Plug-in formats: AAX, Audio Unit, VST3, ARA2
- Free iLok account and iLok License Manager (iLok USB key not required)

Sound Radix continues to push the boundaries of audio technology, and Auto-Align 2.1 is a testament to their dedication to innovation and quality. Experience the future of phase alignment with Auto-Align 2.1.
