

# Zoom Instamic Pro Plus C

Zoom introduces the Instamic Pro Plus C - the world's smallest, professional, waterproof recorder. Instamic is an ultra-compact recorder that captures flawless 32-bit float audio anywhere, even in the harshest conditions. Instamic's 32-bit float recording captures every detail, from whispers, roars, and everything in between, without clipping or distortion. Instamic handles rain, splashes, snow, and even full submersion up to 1 meter for 30 minutes. With its IP67 rating, water, dirt and dust don't stand a chance.

Instamic's ultra-efficient omnidirectional MEMS mics capture immersive, full-spectrum sound, covering 40Hz-20kHz up to 135dB SPL. It measures only 1.5 x 1 x 0.5 inches making it the world's smallest, most professional 32-bit float recorder. Instamic seamlessly syncs audio and video with a 2.5ppm internal timecode clock and supports Atomos and Tentacle Sync wireless timecode - no drift, no guesswork.

Use Instamic as a Bluetooth microphone for your phone or computer, compatible with iOS, Android, macOS, and Windows. With the app, you can record video with Instamic audio - no syncing required. It also integrates seamlessly with third-party apps like Filmic and Blackmagic Camera. The Instamic Remote app (compatible with iOS & Android) unlocks full feature controls for up to 10 units from one device. Power on with a tap, monitor live, sync timecode, and shape your sound with a 3-band EQ.

Experts say the following about the Instamic Pro Plus C:

- "My Instamics were incredibly valuable for the Fortnite jumping low rider recording session. I knew I had to rely on my Instamics because the violent car would have severed my mic cables. They have also been onboard fast-moving tanks!" - Watson Wu
- "Instamic was one of the most innovative audio products that I've ever used, years ahead of the competition." - Philip Bloom
- "Instamic is perfect for my needs both on set in a pinch if I need to record a quick wild line or if I'm out on the hiking trail recording podcasts and

content. It's small, reliable, and delivers high quality audio. A+" - James Appleton

Instamic connects wirelessly to popular action cameras and syncs your audio to the video - no post production needed:

- Insta360 camera (One R, One Rs, X2, X3, X4,X5 Ace Pro and Ace Pro 2)
- Garmin Virb Ultra 30

Instamic comes in stereo/mono and mono models, both recording professional quality audio with 16GB of internal storage (22 hours of recording in 32-bit float mono format).

Recordings Modes Stereo Model:

- Mono: Clean, focused sound for voice, narration, and interviews.
- Dual-Mono: Same mono signal to both channels - ideal for post-processing consistency.
- Stereo: Authentic left/right audio separation - great for ambient sound and music.
- Mid-Side (M/S): Post-adjustable stereo image for flexible spatial control in editing.

Recordings Modes Mono Model:

- Mono: Clean, focused sound for voice, narration, and interviews.
- Dual-Mono: Same mono signal to both channels - ideal for post-processing consistency.

Every Instamic comes with 3 mounting options - magnet clip, tape, and nano suction tape. With 4.5 hours of battery, Instamic gives you plenty of recording time. The USB-C port makes it easily rechargeable. Creators have been using Instamic to go where other recorders can't. Record on the slopes, by the sea, or on the move—without worrying about water, wind, or the unexpected. The optional color covers help the Instamic to disappear into your scene. Whether you're matching it to clothing, a vehicle, or placing it in the background, there is a color to suit your needs.

What's in the Box:

- Instamic Pro Plus C Microphone Recorder
- Magnetic Mount
- USB Charging Cable
- Adhesive and Velcro Mount Options

Optional Accessories: GoPro Adapter, Windshields, Color Covers
