

Alto Professional TX4 Series

Alto Professional today announces the launch of the TX4 Series of powered loudspeakers and subwoofers delivering premium sound and unmatched versatility. Engineered for reliability, power, and simplicity, the TX4 Series is purpose-built to meet the diverse needs of live sound professionals, musicians, DJs, and business owners alike. From intimate gatherings to large-scale events, the TX4 Series excels across a variety of applications, including weddings, restaurants, gyms, DJ booths, rehearsal spaces, and small-to-medium venue setups. Each model in the series is precision-tuned in the USA, providing consistent performance in any environment.

“The TX4 Series is the culmination of Alto Professional’s commitment to creating reliable, high-quality audio solutions for professionals at every level,” said John Boudreau, Director of Product Management at Alto Professional. “Whether it’s a mobile DJ set, a gig or rehearsal, or a restaurant installation, the TX4 Series is designed to deliver powerful performance, unmatched versatility, and ease of use for any situation.”

Key Features of the TX4 Series:

- **Powerful Amplification:** Up to 700W peak power via ultra-efficient Class-D amplifiers.
- **Flexible Connectivity:** Features a built-in 2-channel mixer for mic, line-level, and Bluetooth 5.0 streaming inputs
- **Wireless Freedom:** Bluetooth 5.0 streaming and True Wireless Stereo (TWS) linking for synchronized sound across multiple speakers.
- **Mix Output:** Link multiple speakers easily using the mix output
- **Customizable Sound:** Contour EQ tailored for music or speech applications
- **Consistent, Wide Coverage:** 90° x 60° wide-dispersion horns ensure consistent sound distribution throughout any venue.

- **Durable and Portable:** Lightweight, ergonomic design with full metal grilles for durability on the go.
- **Flexible Mounting Options:** Standard speaker pole socket and monitor angle configurations.
- **Battery-Powered Option:** The TX412B offers up to ten hours of untethered performance for outdoor and mobile events.
- **Designed and Tuned in the USA:** Precision-engineered for reliable live sound performance.

Designed to complement the loudspeakers, the TX12S and TX18S subwoofers deliver precise, powerful, bass for live performances and venue sound systems. Both models are equipped with advanced DSP-based EQ controls and selectable low-pass filters to ensure seamless integration with any PA system.

Key Features of TX4 Subwoofers:

- **High-Output Amplification:** 900W ultra-efficient Class-D power amplifiers power, nuanced, dynamic frequencies and high-output performance.
- **DSP-based EQ Controls and Protection:** Built-in EQ settings and selectable low-pass filters (80Hz, 100Hz, 120Hz) ensure seamless integration.
- **Music and Live EQ Voicings:** Tailor subwoofer response for different applications.
- **Polarity Reverse Switch:** Adaptable configurations to ensure proper phase

alignment

- Versatile Connectivity: Dual XLR + 1/4-inch combo inputs and (2) balanced XLR outputs
- Rugged Design: Internally braced MDF cabinets with a sleek, durable splatter-spray finish.

The TX4 Series adapts effortlessly to various use cases:

- Live Performances: Portable and versatile for musicians and stage monitoring.
- Nightlife and DJs: Deliver powerful audio for club sets, weddings, and mobile gigs.
- Restaurants and Bars: Provide clear, evenly distributed sound in dining or entertainment spaces.
- Fitness Studios and Gyms: Amplify energy with reliable, distortion-free audio.

From live performances to club sets, weddings, and fitness studios - watch as Alto Professional's TX4 Series delivers crystal-clear sound with up to 700W peak power, Bluetooth® 5.0 streaming, and flexible connectivity. Whether you're a musician, DJ, or venue owner, these precision-tuned speakers and subwoofers bring unmatched reliability and dynamic performance to every setting.
