ASI Audio DJ Cable

In response to requests from DJs using the ASI Audio 3DME Active Ambient IEM system with a DJ mixer, ASI Audio x Sensaphonics is now offering the ASI Audio DJ Cable. Both ends of the cable are fitted with high-quality gold-plated 3.5mm TRS plugs. On the mixer end of the cable, the plug has a spring strain relief at the cable entry and is also threaded for an included 1/4-inch adapter to accommodate mixers with 1/4-inch headphone output jacks.

The premium-quality cable, tailored specifically for DJ use but also suited for use by musicians feeding their 3DME system from a personal monitor mixer, has a woven outer wrap for durability and to avoid kinks and knots in a gig bag. Its 1.6-meter/5.25-foot cable length is optimal for its target application. The ASI Audio DJ Cable is available immediately at a price of $39.99 (USD) when sold separately and $29.99 when bundled with a 3DME system purchase.
