Audio Pro launch Drumfire II W & D-2 W

Audio Pro today launches the W-generation version of Drumfire - the full size Drumfire II W and the smaller Drumfire D-2 W. After the launch of the new W-generation speakers in September 2025, Audio Pro is now launching Drumfire models to complete the full range of W-generation speakers. The Drumfire history has been a successful one, ever since Audio Pro launched the first generation in 2018 and now the new W-generation supercharges the sound as well as vastly improving the app experience. The Drumfire II W and Drumfire D-2 W deliver a powerful sound for all music fans with a style that is pure rock and roll.

Nils Ankarcrona, CEO at Audio Pro, says: “The Drumfire II W launch is the last of our W-generation launches, and makes it possible for us to offer our entire range in this new improved W-generation; a generation offering improved sound, a new app and refined design” Sometimes nothing beats loud. Drumfire II W delivers a pure, bold sound with super crisp details. You will physically feel every little part of your music. But loud isn't everything, even listening at low levels, Drumfire II W will make your music come alive. Drumfire II W offers multiroom listening, as well as the option of Google Cast, AirPlay 2, Spotify Connect and Tidal Connect.

The loudspeaker firmware together with the new Audio Pro app, offer Wi-Fi timing

synchronisation and access to a wide range of streaming services. Both will be updated regularly via the app, while firmware updates are managed automatically over-the-air, directly by the speaker. The design is classic rock 'n' roll but with a sophisticated twist. Wrapped in faux leather, with handstitched threads and details in solid aluminum, Drumfire II W will blend naturally into any home environment. Choose between soft white, stylish grey or classic black.

The multiroom function allows you to play the same music throughout your house. Group two speakers together in a left/right setup for a full concert experience... 6 preset buttons give you easy access to your favourite playlists and radio stations. Simply store your lists and stations to these convenient buttons. No need to use the app, just press and play. Streaming services available: Amazon Music, Deezer, iHeart Radio, Napster, Qobuz, QQ Music, Spotify, Tidal, TuneIn, VTuner and many more via Google Cast and AirPlay 2.

The speaker Drumfire D-2 W is the top unit of the Drumfire II W - it delivers quite a punch, even on its own. Delivering pure Hi-Fi acoustics with deep, controlled bass and crispy highs. It offers multiroom listening as well as the option of Google Cast, AirPlay 2, Spotify Connect and Tidal Connect. The loudspeaker firmware together with the new Audio Pro app offer Wi-Fi timing synchronisation and access to a wide range of streaming services.

When the Drumfire D-2 W is included together with the subwoofer in the complete 'Drumfire II W configuration', the crossover is automatically adjusted to let the subwoofer handle the deepest bass, enabling you to play even louder. Both models are available now in the UK, Europe and US. Review samples are available.

Pricing:

- Drumfire D-2 W: £350, €400, $400
- Drumfire II W: £600, €700, $700
