

Audio-Technica October Webinar

"The Truth About 2.4 GHz Wireless"

Audio-Technica, an innovator in transducer technology for over 60 years, invites audio professionals, integrators, and RF enthusiasts to a free, in-depth webinar on Tuesday, October 21, from 2:00-3:00pm EDT, titled The Truth About 2.4 GHz Wireless. Join Mark Donovan, Audio-Technica Director of Commercial Applications, alongside members of A-T's Product Development team, as they provide a real-world demonstration of the System 20 PRO and explore how it overcomes the challenges of operating in crowded RF environments.

In this live session, attendees will learn how Audio-Technica's innovative approach to the 2.4 GHz spectrum is redefining reliability – transforming doubt into dependability. The team will cover system design principles, real-world performance insights, and practical tips for achieving consistent wireless results in today's congested environments.

Webinar Details:

- Topic: The Truth About 2.4 GHz Wireless
- Host: Mark Donovan, Director of Commercial Applications, Audio-Technica
- Date/Time: Tuesday, October 21, at 2:00–3:00pm EDT
- Registration: Click [here](#) to register
- Don't miss this opportunity to experience firsthand how the System 20 PRO

delivers dependable performance even in the most challenging RF conditions.
