beyerdynamic MMX 230 Wireless

German audio specialist beyerdynamic will offer exclusive insights into the future of gaming sound at gamescom 2025. Two new additions to the range, the MMX 150 wireless and the MMX 230 wireless, will make their debut in Cologne. Visitors can experience the MMX 150 wireless firsthand on dedicated gaming setups, while the new MMX 230 wireless will be presented to the public for the first time in a preview exhibition.

Together with Freaks 4U Gaming, beyerdynamic will equip four gaming stations in Hall 8 with the new MMX 150 wireless, offering visitors a first-class sound experience under real conditions. Passionate gamers will have the opportunity to explore the headset’s full potential. The MMX 230 wireless will also be on display, giving visitors a first glimpse of the new wireless flagship model of the MMX series. beyerdynamic's trade fair presence will be complemented by 46 MMX 300 PRO headsets, ensuring an intense gaming experience in the free-to-play area.

The MMX 150 wireless isn’t just at home on consoles or PCs. While developed for focused gaming sessions, it’s equally suitable for casual party games, listening to music, or binge-watching your favorite series. Its wide-ranging soundscape can be customized via the beyerdynamic app. Inside the headset, a 40 mm premium dynamic driver forms the foundation of an immersive sound experience. Gamers benefit from precise spatial reproduction, allowing them to detect even the subtlest in-game sounds. Latency is just 30 milliseconds when used with the included dongle. Alternatively, the headset can connect via Bluetooth® 5.3. LC3 codecs ensure energy-efficient transmission, extending battery life to up to 50 hours.

The META VOICE microphone on the MMX 150 wireless delivers high-quality voice

capture and exceptional flexibility. The boom arm can be positioned freely or removed entirely, instantly transforming the headset into stylish over-ear headphones for everyday use. The microphone features an integrated electret condenser with a transmission range of 20 to 20,000 Hz and can be muted at any time. An integrated sidetone function allows users to hear their voice in real time for optimal sound and volume adjustment. With a sleek black or arctic white finish that avoids flashy gaming aesthetics, it's equally suitable for calls or casual wear. Developed in Germany and manufactured from the usual premium materials, the MMX 150 wireless is both robust and comfortable. Replaceable, breathable velour ear pads ensure long-lasting comfort for extended gaming and streaming sessions. At just 336 grams, it’s lightweight enough to wear for hours without fatigue.

The MMX 230 wireless focuses on performance, catering to ambitious and professional gamers seeking a powerful addition to their setup. Its 40 mm premium dynamic driver delivers exceptional stereo width for pinpoint positional accuracy. Combined with active noise cancellation (ANC), it creates a fully immersive audio experience. For minimal latency and lightning-fast connections, the headset features Bluetooth® 6.0, the latest standard available, enabling quicker reactions in competitive play. Whether engaging in fast-paced shooters or ranked matches, users benefit from precise, detailed sound reproduction.

The MMX 230 wireless is the first beyerdynamic gaming headset to feature a replaceable battery. Users can easily open the ear cup and swap batteries, maintaining long-term performance of up to 60 hours per charge. Designed for versatility, it integrates seamlessly with pro setups, supporting PCs, consoles, interfaces, and capture cards. Thanks to environmental noise cancellation (ENC), the high-quality microphone filters out distracting background noise, ensuring clear communication even in challenging environments. This model also debuts a consistently ergonomic design for the MMX range. The padded headband adapts naturally to the wearer’s head, while replaceable velour ear pads provide lasting comfort. Developed in Germany from premium materials, the MMX 230 wireless is both durable and lightweight at only 320 grams. Available in black and arctic white, it delivers a professional look in any setting.

“With the MMX 150 wireless and the MMX 230 wireless, we are expanding our portfolio with two products that address different gaming levels but share the same goal: combining performance and lifestyle in one,” explains Jan Salau, Product Manager at beyerdynamic. “We are confident that these new additions will enrich our users’ everyday lives in many ways.”

Both products will launch in Q4 2025 via the online shop at www.beyerdynamic.com, on Amazon and in retail stores. The MMX 150 wireless will be available at a recommended retail price of €179.00, and the MMX 230 wireless at a price of €249.00. Replacement parts and ear pads can be reordered separately.
