

Christian Van De Pas returns to RCF and dBTechnologies team

The RCF and dBTechnologies team announces the latest addition to its Benelux staff: Christian Van De Pas, a highly experienced pro audio industry expert. Van de Pas, who has previously been a valued part of the team, takes on the crucial role of Application Support Engineer for the RCF and dBTechnologies brands in Benelux from June 2023.

On re-joining the team, Van De Pas brings an impressive experience of over 25 years in various key positions, including product manager, live sound, and FOH engineer. He profoundly understands dBTechnologies and RCF products and is very familiar with customer requirements and application areas.

He looks forward to his return to the company: "It's a great feeling to be back. Many products, as are the friendly colleagues, are very familiar to me from my earlier time at the company. The two traditional Italian brands RCF and dBTechnologies, always fascinate me with their impressive innovative power. I'm really looking forward to the upcoming projects with existing and new customers, where we will use well-known and future products."

The excitement about Van De Pas' return is also felt by Harald von Falkenstein, Sales Director at dBTechnologies Germany: "We are overjoyed to have Christian

Van De Pas back with us. His professional skills are outstanding, and he knows our company and the products like the back of his hand. Therefore, we are sure that our customers in Benelux will benefit enormously from his expertise. In his new position as Application Support Engineer, he will work closely with the customers and their projects. I am sure he will make a decisive contribution to the successful completion of many productions."
