

# EPOS IMPACT 100 Gen2

Global audio specialist EPOS has successfully developed an enhanced version of its popular IMPACT 100 wired headset, boasting a series of impressive additional features. The EPOS IMPACT 100 is an ultra-lightweight, sleek device designed for all-day comfort, clear audio and seamless integration with Microsoft Teams and other UC platforms. The improved version is built for hybrid working and benefits from greater comfort with softer materials, clearer voice transmission through an improved boom arm, an advanced noise cancelling microphone, plus dual USB-C and A connectivity.

Available in mono or stereo variants, the high value entry-level headset is ideally suited for ‘talk-heavy’ professionals. Since its launch last year, it’s rapidly become an even more popular part of the company’s extensive headset and speakerphone portfolio, according to Martin Kipping, EPOS Sales Director, DACH.

“The EPOS IMPACT 100 balances lightweight comfort, high-quality audio, and robust build. Its noise-cancelling microphone, versatile connectivity and extensive platform certifications make it suitable for office professionals, remote workers and anyone needing reliable communication tools for extended periods. “Whilst there are many advantages of wireless headsets, high quality wired versions remain extremely

popular especially where webcams are connected to desk screens, so users can take advantage of easy plug-and-play functionality.”

He added: “We put intuitive call control at a user’s fingertips with distinctively shaped buttons and LED icons ensuring there’s no need to look down to find the right function. “In addition, the versatile boom arm can be worn on either side, as a uni-directional microphone and noise cancelling algorithms improve call quality. Durable leatherette earpads are combined with an amarid fiber reinforced cable, ensuring the IMPACT 100 is a headset to rely on, even in the most demanding settings, at home or in the office.”

Martin concluded: “The IMPACT 100 represents a significant improvement on its predecessor and further demonstrates our power of audio pedigree that stretches back more than 115 years.”
