

American HK Audio COSMO Launch

HK Audio has announced a special event to mark the American launch of its popular COSMO line array. Customers, dealers, reps, integrators and industry guests are invited to join the German manufacturer and its US distribution partner KMC Music to be among the first in the country to hear COSMO in action at the OPAV headquarters in Orlando on November 4.

The COSMO line array system was developed to be an extremely flexible and easily configurable solution for professional sound applications. It has proven its capabilities in the field with rental houses across just about every continent relying on COSMO for the gigs that matter most. This has seen the compact line array put to use all over the world, covering everything from stadium sound in Morocco to classic rave anthems in Germany and arena shows in Lithuania to Bollywood concerts in India in the last few months alone.

“Audio professionals all over the world have discovered just how versatile and powerful COSMO is, and I’m delighted to be able to introduce its capabilities to the concert sound community in the US,” said Sean Martin, International Sales Manager – The Americas for HK Audio. “COSMO is unique. It offers immense power, articulation and long throw from a compact enclosure that is simple to rig. Added to this, you have the confidence that comes from its Made in Germany quality, all backed by a five-year warranty.”
