HK Audio for Thomann Live Days 2026

HK Audio is delighted to support the first “Live Days presented by Thomann” as an official sponsor. The new trade fair and networking event will take place from 5 to 30 May 2026 at Thomann in Treppendorf near Bamberg and, over the course of several weeks, will offer a central platform for professional development, practical knowledge exchange and networking within the professional events and audio industry.

Organised by Thomann, Live Days is aimed at professionals, musicians, creators and tech enthusiasts, combining a trade fair, hands-on sessions, live demonstrations and networking with leading manufacturers and brands in the industry. The focus is on direct exchange, practical sessions at audio, lighting and video consoles, experiencing large PA systems, and the latest developments in the events industry.

HK Audio is actively participating in the event with several programme items. On 15 and 16 May 2026, HK Audio will host the practical seminar ‘Sound Engineering for Wind Music’ as part of the HKademy. HK Audio Product Manager Stephan Kuczera will cover the fundamentals and applications of physical acoustics, room acoustics, microphone technology, mixing console technology, dynamics processing, filter technology, and modern loudspeaker and network technologies such as line and bass arrays or the MILAN Audio Network.

On 29 and 30 May, HK Audio will be presenting a live demonstration of the LINEAR 5 MK2 High Power System at the PA Playground, giving visitors a first-hand, practical insight into modern sound reinforcement solutions. In addition, HK Audio invites you
