

Mackie Thrashv2

Today, Mackie announces Thrashv2, the speaker that condenses all the company's experience and knowledge into the essential Mackie powered loudspeaker. Thrashv2 makes volume, sound quality and technology accessible for anyone who needs to be heard. Make no mistake: If you're tired of getting drowned out, you need a loudspeaker. At the core of Thrashv2 is our clean 1300W Class-D amp for in-your face volume. Thrash12v2 and Thrash15v2 feature a punchy 12" and 15" woofer, respectively, plus a custom 1" compression driver for sparkling high end. Need to cut through at rehearsal? Need to set up a DIY space that packs a punch? Need to amplify your amp sim guitar pedal in your home studio, without losing every detail of your tone? Yes, you need a loudspeaker. Thrashv2 is that loudspeaker.

Mackie brings Power to Everyone with Thrashv2 Loudspeakers

Monday, 07 September 2026 13:34

Mackie Thrashv2 strips the form factor of a powered loudspeaker down to its essentials. That means extremely rugged build quality and no-fuss I/O. Thrashv2 speakers have everything you want and nothing you don't. Use the single combo input for mic and line sources. Stream wirelessly from your phone via Bluetooth to up to two speakers at once. The thru output lets you chain the signal (including the Bluetooth) to other speakers. Whether you're using Thrashv2 as a PA system, stage monitor or full-range, flat-response amp, this versatile speaker gets the job done and holds up to heavy use.

Thrashv2 is simple, but it's also genius. It has the innovative technology that defines a Mackie loudspeaker. Switch between four voicing modes (Flat, DJ, Live and Wedge) to tailor the speaker to your application. Flip on the gig-saving Feedback Eliminator to magically eliminate microphone feedback. These are straightforward, push-button features that make it easy for anyone to get loud, clear sound, no matter their experience level.

Mackie Thrashv2 works vertically or horizontally, or mounted via the built-in pole mount and tightening screw. The mount lets you place Thrashv2 on the T100 tripod, or use the SPM400 speaker pole to mount Thrashv2 above a Mackie subwoofer. For keeping the speaker protected while traveling between gigs and rehearsals, Mackie branded Thrashv2 speaker bags are available. (T100, SPM400 and speaker bags sold separately.)

Mackie brings Power to Everyone with Thrashv2 Loudspeakers

Monday, 07 September 2026 13:34

Since 1989, Mackie has defined the sound of DIY spaces, pop-up shows, jam sessions and beloved local music venues, all over the world. Thrashv2 carries that legacy forward by making the legendary power and performance of a Mackie loudspeaker more accessible than ever.

Mackie Thrash12v2 and Thrash15v2 are available now.
