Martin Audio Open Days 2022

Martin Audio has confirmed its first series of Open Days for the new year. Following the success of the Open Days in September 2021 the High Wycombe company will hold two product demos at its HQ on March 8th and 9th. Operating under COVID safety conditions, the event kicks off on March 8th, with two-hour presentations at 9.30am and 2.00pm, and will repeat this programme on the following day (March 9th).

Visitors can expect to hear demonstrations of the LE and XE stage monitors, point source loudspeakers from BlacklineX and BlacklineX Powered ranges, the TORUS constant curvature array and a selection of optimised line arrays from the Wavefront Precision series.

In addition, attendees will be able to become better acquainted with Focusrite Pro and Optimal Audio, sister brands within the wider Focusrite Group. For further information on the Open Days visit the website below.
