

Martin Audio UK Open Days March 2026

Martin Audio, alongside sister brands TiMax, Linea Research, and Optimal Audio, has announced an exciting evolution of its celebrated UK Open Days event, scheduled for 24–26 March 2026 at its High Wycombe headquarters. Renowned for high-quality insights and networking, Martin Audio’s Open Days have become an essential date in the professional audio calendar. This year, the newly imagined event will go beyond traditional product showcases to creatively demonstrate how the group’s complete audio ecosystems provide exceptional and readily-deployable solutions for today’s real-world vertical market challenges.

James King, Marketing Director, commented: “This fresh approach to our Open Days builds upon the success of our ISE demo room experience. By using projection mapping to create realistic environments, we will explore the challenges of modern sound design and show how our brands intersect to provide compelling solutions and a competitive edge for sound professionals.”

Ideally suited for AV installers, system integrators, consultants, and live sound specialists, the program will focus on application-specific system design, workflow, and practical deployment. The demonstrations will explore how loudspeaker systems, amplification, immersive processing, and system control software can

combine to deliver outstanding results for audiences in permanent installations, touring productions, and temporary event spaces.

The Open Days run across three days with a consistent daily schedule, allowing attendees to choose a single-day program or drop in over multiple days. The event takes place at Martin Audio's company HQ, Century Point, Halifax Road, Cressex Business Park, High Wycombe, Bucks, HP12 3SL. Free parking is available on-site. Refreshments will be available throughout the event and guests will enjoy plenty of opportunities to meet the team. For more information and tickets, please visit the website below.
