

NEXO L15-I, L18-I & L20-I

NEXO has expanded its industry-standard P+ Series point source loudspeaker range with three new sub-bass speakers, the L15-I, L18-I and L20-I. Developed specifically for permanent installations, the new models are a development of the existing touring versions, and feature fabric-covered front grilles and quick-connect push connectors with IP cover protection. Available in black, white or custom RAL colours, cabinets feature threaded inserts on the back and both sides for use with a comprehensive range of mounting hardware.

L15-I, L18-I and L20-I subs feature single 15-inch, 18-inch and 20-inch long-excursion neodymium drivers, extending the LF response of a P+ Series installation down to 40Hz, 32Hz and 28Hz respectively. At the same time, NEXO has announced a new V3.1 release of its NeMo remote control app for a group of NXAMP and NXAMPMk2 Powered TD-Controllers, now delivering the same powerful control, monitoring, logging and alerting functions for Windows and macOS. NeMo v2.4 remains available for iOS.

NEXO announces New Subs, NXAMP Firmware and NeMo Software Updates

Thursday, 28 March 2024 14:00

Also new from NEXO, new firmware LOAD5_28 for NXAMP and NXAMPMk2 Powered TD-Controllers delivers uprated performance for NEXO GEO M12 line array systems including an additional +4 dB gain and more presence in the vocal range. Developed in consultation with leading monitor engineers, updated pre-sets for NEXO P15 wedge monitor setups are also included. NeMo V3.1 and firmware LOAD5_28 are available to download free from the NEXO website, where full details of the new L15-I, L18-I and L20-I can also be found.
