

PSB Speakers PWM Sat

PSB Speaker announces the PWM Sat On-Wall Speaker, the newest and most compact model in its acclaimed PWM Series. Available in satin black or satin white finishes, the PWM Sat delivers audiophile performance in a slim, décor-friendly design that integrates seamlessly into any room. Priced at \$1,099 USD (tariff adjusted) and 1,299 CAD per pair, it gives integrators and music lovers a versatile solution that combines performance, flexibility, and style.

Compact in size yet full of capability, the PWM Sat brings PSB's Synchrony-based driver technology to a streamlined design. Its 1" titanium dome tweeter and 4" woven carbon fiber woofer produce lifelike clarity and natural detail across music, movies, and surround sound. Whether listening quietly at night or filling the room with cinematic sound, the PWM Sat delivers both nuance and power.

The PWM Sat was designed with real-world applications in mind. Its two-piece locking bracket system, supports secure installation in horizontal, vertical, or ceiling orientations. This flexibility makes it ideal as a main left/right channel, side or rear surround, height channel in an immersive Dolby Atmos system, or as a compact 2-channel solution paired with a subwoofer.

Beyond mounting flexibility, the PWM Sat matches perfectly with other PWM Series models and integrates seamlessly into any PSB system. Visually discreet yet

sonically capable, the PWM Sat is tonally matched with PSB's on-wall, in-room, and architectural speakers. This ensures a consistent sound signature across the entire line, giving music and movie lovers the confidence to expand their systems without compromise. The compact and discrete PWM Sat represents a rare combination of performance, size, and value, making it a natural fit in PSB's growing family of home and architectural audio solutions.
