Sylvain Thevenard joins Adamson

Adamson, a Company with expertise in loudspeaker manufacturing and technology for over 40 years,has been investing in a strong team of software engineers who recognize the importance of sound quality, clarity,and fidelity. Adamson is announces the appointment of Sylvain Thévenard as Software Manager.

Thévenard brings extensive experience in the audio industry, having roots in both recording studio and live sound engineering, and is dedicated to enhancing the enjoyment and coherence of music. His expertise in spatial audio, which he began exploring in 2010, allowed him to create elevated sound imaging experiences. As a Spatial Audio Architect at Adamson, he played a key role in developing the FletcherMachine with the European software team.

Brian Fraser, Head of Product & Technology at Adamson, expressed enthusiasm about Thévenard's promotion: “Sylvain’s advancement within the company reflects the dedication Adamson has to developing incredible technology in-house. We are excited to develop more user-friendly and cutting-edge software products that will transform the pro audio landscape.”
