TOA Electronics CX-1000 Series

TOA Electronics introduce the CX-1000 Series, an IP-based PA and Intercom system designed to connect people, enhance security, and streamline communication. The CX-1000 Series combines user-friendly operation with security, reliability, and flexibility for a wide range of applications. Make audio and video calls, broadcast messages, and monitor CCTV footage from a single interface, with PA and intercom working seamlessly together.

With support for open IP interfaces such as SIP, ONVIF, and multicast audio, CX-1000 integrates TOA systems as well as third-party devices, creating a unified and flexible communication platform. The system offers a wide range of software functions including manual zone paging, background music (BGM), group calls, call forwarding, door control, camera monitoring, and much more.

Key benefits at a glance

- Seamless interaction between PA and intercom
- Clear and precise sound quality
- Scalable up to 3.000 connected devices
- Easy and intuitive system operation
- Flexible integration of additional systems
