# Union Audio Orbit Series

Orbit LE4 FX

High-end analogue DJ equipment designer, Union Audio Limited, announces the release of four new products - the Orbit LE2, Orbit LE4, and the ground-breaking Orbit LE2 FX and Orbit LE4 FX – offering a new range of accessible 2 and 4 channel rotary mixers.

The Orbit LE2 and LE4 are high-performance rotary analogue DJ mixers, featuring fully independent channels, each equipped with high-quality phono pre-amplifier and line inputs, high-pass filter with variable Q, FX Send with pre/post switch, and a precise Alps rotary fader. The Master section features a 3-band Isolator, and separate level controls for Master Out, Booth Out and Aux Return, whilst comprehensive monitoring is via two backlit custom analogue VU meters, with a powerful headphone amp featuring both Split Cue and Cue/Mix, plus 1/4” and 3.5mm headphone jack sockets for maximum versatility.

Building on the LE2 and LE4, the Orbit LE2 FX and Orbit LE4 FX uniquely feature an integrated DSP FX unit and a powerful 4-band isolator, offering unparalleled creative potential in a single, elegantly crafted device, blending the best of analogue warmth with eight creative digital effects including delays, reverbs, phaser, flanger, bit-crusher and resonant filters. In addition, the mixer can also be connected to an external FX unit for even greater audio manipulation, with the choice of running both internal and external effects simultaneously.

Orbit LE4 FX

"We are excited that these new products are joining the portfolio, which has been expanded to meet the diverse needs of our customers, whilst maintaining the same superior audio excellence, build construction and innovative design across the range," said Andy Rigby-Jones, CEO of Union Audio Limited. "The classically designed Orbit LE2 and LE4 offer high performance, quality and excellent value for money, whilst the LE2 FX and LE4 FX take this further with the inclusion of a digital FX engine, perfect for audiophiles and professionals who want to push the boundaries of sound design, whether in the studio or during live performances."

The Orbit LE2, Orbit LE4, Orbit LE2 FX, and Orbit LE4 FX will be available for purchase immediately on the Union Audio Limited website and through authorised retailers.
