Van Damme VDC-32

Van Damme is supporting live sound professionals with the launch of the VDC-32 Breakout Box. The new solution has been created to compliment L-Series loudspeakers from L-Acoustics, offering users a cost-effective way to deploy large and complex audio systems. The L-Series has proved to be a popular choice for rental companies since its launch in 2023 and has been put to use on hundreds of tours and festival stages around the world. The new offering from Van Damme is designed to support these companies and the investment they have made in L-Series, offering them a reliable workhorse that delivers the results they need every show.

The VDC-36 Breakout Box receives its signal via a VDM 37 Male Panel Mount. The output is delivered via eight Neutrik NL4MPXX SpeakOn and four 8-pole PA-CON Male connectors. The breakout box further benefits from relying on Van Damme's premium 32 x 1.5mm speaker cable for all wiring, ensuring the performance that users will expect.

"At Van Damme we pride ourselves on creating the tools that engineers need every day, and the VDC-32 Breakout Box certainly achieves this," said Jim Bulbeck, Technical Manager at Van Damme. "We understand the demands put on touring equipment, so we have built this solution to be robust and road ready. However, we also know that budgets are tight and margins are smaller than ever for rental houses. With the VDC-32, we have ensured that users will experience the Van Damme quality that they can trust at a price point that will support their businesses."

To ensure costs are kept to a minimum while maximising quality, the VDC-32
