AVPro Edge STILE App

AVPro Edge has introduced the STILE App, enabling users to intuitively control their AVPro Edge MV-41 multi-viewer processor and everything connected to it. The STILE App facilitates effortless configuration on both iOS and Android devices so that users can switch, route, and configure sources via a clever drag-and-drop interface for ease of operation and flawless performance.

“As video displays exceed 100-inches and laser projectors achieve even larger picture sizes, users have been more inclined than ever before to enjoy multiple video programs simultaneously,” explained Matt Murray, CTO at AVPro Edge. “The STILE App and MV-41 multi-viewer enables users to elevate their entertainment experience, enjoying exceptional picture quality and an astonishingly intuitive drag-and-drop app that lets anyone instantly switch layouts, assign inputs, or adjust settings without disruption. AVPro Edge has redefined the multi-viewer experience for every application.”

Managing multiple sources and displays has never been easier. STILE gives users total control over their MV-41 multi-viewer, enabling them to quickly swap between inputs and show up to four sources per TV. With seamless integration and an easy setup process, A/V pros can bring added value to each client by customizing their viewing experience without complicated remotes or settings - just tap, drag, and enjoy. Users can also master the STILE App to create their own favorite
