

Sennheiser EW-D Wireless Systems Deals

Sennheiser's Evolution Wireless Digital EW-D microphone systems have become a staple for bands and performers who value audio quality and UHF reliability. With setup simplicity via the Smart Assist app, operating an Evolution Wireless Digital system is a breeze. For those who have not yet made the switch to digital wireless, the month of June presents an ideal opportunity: Participating Sennheiser dealers will offer discounts on Sennheiser's EW-D wireless microphone and instrument systems between 1 June 2025 and 30 June 2025. And as a special bonus, those who purchased an eligible EW-D system or EW-D EM receiver between 1 April 2025 and 30 June 2025 will have the chance to win one of 80 limited 80th anniversary edition pairs of Ruby Red HD 25 headphones.

"Evolution Wireless Digital EW-D has become the go-to series for those who demand professional sound and performance without the complexity," explains Jimmy R. Landry, Category Market Manager MI at Sennheiser. "To celebrate that success and Sennheiser's 80th anniversary, we are excited to offer our wireless customers the chance to win a pair of limited-edition HD 25 headphones. It's our way of saying thank you and celebrating eight decades of innovation in sound."

The Evolution Wireless Digital EW-D series was designed to make wireless as easy as using an app - and has garnered 5-star reviews about its pristine audio quality, rock-solid reliability, and the worry-free Smart Assist app, which takes over the tedious job of setting up the wireless for a gig, and helps in monitoring and troubleshooting.

Just like evolution wireless G4, Evolution Wireless Digital features a professional UHF connection between tour-proof transmitters and receivers, but it takes users from the analogue to the digital world. Digital wireless offers some sonic advantages over analogue, there is no RF noise floor, and the audio is crisp and clear. The latency of EW-D systems is at just 1.9 ms, which makes the sound feel natural and immediate, and thanks to the ultra-wide dynamic range of 134 dB on the transmitter, the EW-D wireless mic will handle very quiet and extremely loud sources effortlessly.

Wireless customers who have purchased an eligible rack-mount system or standalone rack-mount receiver of the EW-D, EW-DX or Digital 6000 series between 1 April and 30 June 2025 can enter to win one of 80 pairs of limited 80th anniversary edition Ruby Red HD 25. Customers are asked to register their eligible purchase here and agree to the terms and conditions. Registration is open from 2 June 2025, 10 a.m. CEST until 31 August 2025, 11:59 p.m. CEST. Landry comments, "Don't miss your chance to own a piece of Sennheiser history - in stunning Ruby Red!"
