Yamaha and NEXO at ISE 2022

As the constraints caused by the pandemic are gradually coming to an end, Yamaha and NEXO will be exhibiting at the Integrated Systems Europe (ISE) trade show with the aim of bringing people together again and discussing what the professional audio industry can do to make the world a better place. ISE 2022 takes place at Fira Barcelona from 10-13 May, with Yamaha and NEXO exhibiting on Stand 3B250.

“The pro audio industry facilitates communication, enriches cultural life and creates bonds through music. Together with our clients, we want to be a key part of that and it will be the main theme of our presence at ISE 2022,” says Nils-Peter Keller, Senior Director, Pro Audio & AV Group, Yamaha Music Europe GmbH.

Representatives from Yamaha branches throughout Europe will be present to discuss products and projects, including the members of Yamaha Music Europe’s System Engineering Group team, specialists in the design, engineering and support of complex audio systems.

Of course the company will be showing its full range of installed audio products, including speakers, amplifiers and control solutions. The show will also mark the European debut for several recently-launched innovations, including the revolutionary RUio16-D/VST Rack Pro, which allows users to add VST3 plug-ins to any Dante-based audio system.

Showcasing the flexibility of the Yamaha range, there will be a number of products on demonstration, including a binaural demo of AFC4 immersive audio, bespoke ProVisionaire control solutions and the ADECIA ceiling microphone and line array speaker solution. The new ADECIA Wireless Solution and RM-W series flexible wireless microphone system - with four different models of tabletop and gooseneck microphones - will also be on show.

The stand’s audio network will be available to view, showcasing Yamaha’s network switches and LAN Monitor app for Windows and Macintosh computers.

NEXO will be showing key new installation speakers, including the ID84, the company’s first column model. It features size-to-power ratio and variable directivity designed to make it easily configured as a scalable solution for acoustically challenging spaces, including public areas, transport hubs, houses of worship, theatres and more. Also on show will be the new ePS series. Taking

inspiration from the industry-standard, point source PS series, NEXO has produced three cost-effective, powerful and lightweight models in 6”, 8” and 10” versions, plus dedicated subwoofers, for cost-critical installations.

”As our first major European trade show appearance for two years, we are very much looking forward to once again meeting new and existing customers face-to-face,” adds Nils. “With Yamaha and NEXO staff from throughout Europe on the stand, we will be there to talk your language, happy to discuss everything from initial enquiries through to complex audio engineering solutions.”
