ADDAC System VC Looper & Granular Processor

ADDAC System announces its new ADDAC112S and ADDAC112SF, portable compact solutions for its powerful ADDAC112 VC Looper & Granular Processor launched last summer. Now available as a standalone instrument with a dedicated frame, the VC Looper & Granular Processor brings a sea of possibilities to modular synthesists looking to integrate granular synthesis and powerful looping features into their soundscapes

Whether you are new to modular synthesis and looking for a powerful 'gateway' to sonic creativity, or you are already a Eurorack user looking to augment your system with deeper powerful new capabilities, ADDAC System's new standalone desktop option makes it easy to integrate the ADDAC112 VC Looper & Granular Processor into your existing set up.

If you are an existing owner of the ADDAC112, the frame is available for separate purchase and provides all the necessary power through a convenient USB-C connector. The frame also features retractable feet that can be adjusted to a 30-degree angle, allowing for convenient ergonomic use within your studio or portable system.

The frame's intelligent and compact design complements any setup, and will make a statement on either your desktop or floorboard. Its sturdy construction will protect
