

Apogee Electronics Partnership with Ginger Audio for Dolby Atmos

Apogee Electronics, a company with expertise in digital audio recording technology since 1985, announces a strategic partnership with Ginger Audio to provide new Symphony Mk II customers with a comprehensive Dolby Atmos solution using Ginger Audio's GroundControl Sphere software.

Starting November 1st, 2023, Symphony Mk II customers will have the exclusive chance to acquire Ginger Audio's GroundControl Sphere software at an incredible 40% discount. This innovative software provides all the necessary functionality to transform your studio to meet Dolby Atmos specifications. Key features of GroundControl Sphere include:

- 8 Selectable Software Inputs & Outputs. Offering a wide range of configurability.
- Flexible Bass Management. Supporting configurations up to 9.1.6.
- Powerful Room Correction. Utilizing your favorite EQ plugin or Sonarworks profile.
- Apple Music Reference: Allows you to compare your mix with 7.1.4 Atmos tracks from Apple Music, ensuring precision in your soundscapes.

Apogee Electronics announces Partnership with Ginger Audio for Dolby Atmos

Wednesday, 25 October 2023 19:04

To showcase this groundbreaking partnership, Apogee Electronics and Ginger Audio will be present at AES 2023, one of the premier events in the audio industry. We invite you to visit our booth and witness the synergy between Apogee's Symphony Mk II and Ginger Audio's GroundControl Sphere in action. Join Apogee at AES 2023 and witness the future of immersive audio technology at the Software Pavillion #SW1.
