

Apple Silicon & VST3 Update for AIR Music Tech Classic Plugins

AIR Music Tech announces the launch of a public beta that enables Apple Silicon and VST3 compatibility for several of its classic plugins, including Structure, Strike, and Transfuser 2. "Enhancing our classic plugins for the latest platforms such as Apple Silicon and VST3 represents our ongoing commitment to innovation and providing powerful, forward-thinking tools," says Neal Gustafson, Software Marketing Manager at AIR Music Tech. "We are excited for users to experience these enhancements and contribute to the final improvements."

This update marks a significant advancement in ensuring that legacy software meets the evolving creative demands of modern producers and musicians. Participants in the beta program are encouraged to provide feedback and report bugs via a straightforward online form. Such feedback will be crucial for refining the software before its final release.

The public beta is open to all licensed users of the following products:

- Hybrid 3
- Structure
- Loom 2
- Strike
- Velvet
- DB-33
- Transfuser 2
- The Riser
- Vacuum Pro
- Mini Grand
- Xpand!2
- Boom
- Vacuum
- Creative FX Collection Plus (WIN 11 VST3)

Licensed users interested in joining the public beta can sign up [here](https://www.airmusictech.com). For new users interested in trying out these incredible plug-ins there is a 7-day trial available.
