Arturia FX Collection 6

FX Collection 6 is a carefully curated selection of 39 studio mixing tools and creative production effects which couple advanced digital signal processing and analog modeling to achieve unparalleled audio precision. The picture above shows the Mix DRUMS interface. From revered studio emulations to forward-thinking processors, FX Collection 6 allows beginners and audio professionals alike to transform their sound, enhance their mix and add those final touches that bind everything together.

FX Collection 6 features a unique balance between studio mixing tools and creative production effects:

- Efx AMBIENT: For cutting-edge producers looking to shape singular soundscapes intuitively. It delivers novel, emotive textures through 6 expertly designed modes.
- Pitch SHIFTER-910 NEW: For music makers, especially rock & indie ones, who want to add grainy textures, harmony and space to their vocals, but also guitars, keyboard and percussion.
- Bus TRANSIENT: A professional transient shaper designed to give you instant control over the attack and sustain of your sound. From tighter drums to punchier mixes, it delivers fast, musical results.
- Mix DRUMS: Designed to increase the impact and perceptual loudness of your drums, while preserving peak levels. Developed with mixing engineer Emre Ramazanoglu, it streamlines complex drum processing workflows into a single, efficient tool.
- Tape J-37: Tape J-37 is your go-to tool for bringing tube-driven depth and character to your sound - whether adding subtle tape coloration to a master track or driving the input of a bus or insert with harmonic distortion.
