

Arturia V Collection 11

V collection 11 is a premium suite of software instruments for unparalleled sonic exploration; from evocative emulations and hybrid synth engines, to authentically modeled keyboards and beautifully captured acoustic sounds. One of the new plugins included is the Jup 8000 V pictured above.

With new additions, major Augmented Series upgrades, and exclusive preset packs, V Collection 11 is more than just an update - it's a creative catalyst, merging the past and future of what's possible with sound, and a workflow built for modern music production.

Step into fresh sonic territory, from millennium Supersaw to a spellbinding SEM remake. V Collection 11 expands your toolkit with 7 new instruments including a comprehensive overhaul of the Augmented series.

New instruments:

- Jup 8000 V: The definitive supersaw synth - stack leads and drive euphoric builds with modern control.
- Pure LoFi: Embrace imperfection and transform bitcrush into sonic blooms, wear into warmth, and noise into ambience.

Newly included:

- Synthx V: The Elka Synthex reimagined - craft rich, multi-layered analog sounds with next-level expression.
- MiniBrute V: Discover the analog grit and brute spirit of an Arturia original synth, elevated with powerful effects.
- Augmented YANGTZE: An exploration of China's rich musical heritage,

woven into the fabric of modern sound design.

- Augmented MALLETS: Now in its full version, Augmented Mallets elevates any project with evolving strikes, percussive tones, and ethereal mallet melodies.

Completely rebuilt:

- SEM V: Entirely remodeled and remade Oberheim SEM – classic 70s tone with modern flexibility for bold analog sounds.

Access the full Augmented Series 2, with each instrument completely redesigned including Augmented BRASS, WOODWINDS and PIANO plus new sampled content and factory banks for Augmented STRINGS and VOICES.
