Arturia Augmented PERSIA

Augmented PERSIA is an exploration of a distinctive Persian and Middle Eastern musical palette, reimagined through a modern hybrid workflow. With 6 deeply-sampled instruments, expressive articulations, and Augmented’s multilayered synthesis architecture, it moves effortlessly from rooted acoustic timbres to cinematic movement, abstract texture, and contemporary sound design. Access production-ready sounds instantly with intuitive preset browsing, then shape and transform them with Morph, macros, modulation, sequencing, and effects.

Augmented PERSIA Features:

- Cutting-edge synth engines: Powered by Virtual Analog, Granular, Wavetable, Harmonic, and Simpler engines, Augmented PERSIA opens the door to evolving ambiences, hybrid textures, experimental processing, and bold sonic transformation.
- Deep sound design:Fine-tune your sample and synth layers, then add modulation, arpeggiation, sequencing, effects, and macros in one streamlined interface designed for fast, musical exploration.
- Expression & morphing: With the Morph control, move across a wide spectrum of sound - from organic instrumental realism to otherworldly synthetic color - and reshape key sonic characteristics in real time with intuitive macros.
- Versatile presets: Explore over 200 expertly-crafted presets, from authentic
