

# Arturia AstroLab 37

Arturia releases AstroLab 37, a compact stage keyboard that brings the full power of the AstroLab ecosystem into a portable, performance-ready format. Engineered for liftoff, AstroLab 37 redefines what a compact performance keyboard can be. Combining an unrivaled sound palette with intuitive controls and a seamless studio-to-stage experience, it empowers musicians to perform with confidence and limitless sonic freedom. Future-proof by design, AstroLab receives regular firmware upgrades that deepen its power and enhance the user experience.

Instantly access a universe of reference synths, classic keyboards, acoustic instruments, and cinematic hybrids - all deeply customizable via onboard controls. The 37 slim-key slim keyboard with aftertouch, vocoder, and performance modes turns ideas into fast-moving solos, dynamic leads, and unforgettable hooks.

### Features:

- Purpose-built for live: rugged, responsive, and completely standalone. Power up, pick a sound, shape it in real-time and deliver pure musical expression wherever you play - with low latency.
- Compact by design: From studios and stages to bedrooms and DJ booths, AstroLab 37 adapts to every space. Road-ready construction, expressive keys, and instant sound recall make it the ultimate creative companion on the move.
- Made to explore: Edit your presets on-the-fly or dive deeper with Analog Lab on desktop or AstroLab Connect on mobile. Manage sounds, refine macros, and organize playlists - all with a seamless workflow that keeps your creativity uninterrupted.
- A universe of iconic sounds: 44 instruments and 1,800+ presets onboard, spanning analog classics, modern hybrids, pianos, and performance essentials - expandable via Analog Lab, V Collection, and Pigments.
- Creative toolset: Built-in arpeggiator, Chord & Scale modes, vocoder, performance modes, hands-on Macros, and up to 12 insert FX per preset

## Arturia introduces AstroLab 37: Play Big

Tuesday, 25 November 2025 18:00

---

- equip you for expressive play and dynamic live sets.
- Color screen & navigation: Browse presets, cue playlists, and monitor parameters at a glance with the bright display and navigation encoder - no menu-diving mid-gig.
  - Modern connectivity: MIDI I/O, USB-C, USB-A host, balanced mono input & output, mic input, Bluetooth audio, WiFi, and pedal input integrate AstroLab 37 effortlessly into any live or studio setup.
