

Arturia Explorations Vol.2 Expansions

Arturia introduces its latest preset expansions for Pigments & Analog Lab (Play, Intro & Pro): Explorations Vol.2. It comprises 450 experimental and innovative sounds, ranging from unconventional ambient textures to hypnotic psychedelic effects and expressive trap elements. Designed for Analog Lab (Play, Intro & Pro) & Pigments, Explorations Vol.2 is available for an exclusive price until the 2nd of September.

Exploring the edges of electronic sound design, Explorations Vol.2 offers a fresh take on established musical styles. Disrupt convention and take your music in a new direction with 3 soundbanks for the price of 1.

Discover 3 soundbanks, each containing 150 presets, inspired by the experimental edges of music production and sound design:

- Ambient Explorations: From lustrous expanses to intense and prismatic textures, disrupt the conventions of ambient composition.
- Psychedelic Explorations: Explore the experimental frontiers of psychedelic music, from introspective textures to razor-sharp synthetic sounds.
- Trap Explorations: Drawing inspiration from the fringes of the contemporary trap music scene, Trap Explorations strikes a balance between dark synthetic sounds and vibrant organic textures.
