Arturia Pigments Explorations Vol.4

Today, Arturia released its newest preset bundle for Pigments & Analog Lab: Explorations Vol.4. From hypermodern club tools to immersive interactive soundscapes, Explorations Vol.4 redefines what’s possible with sound design.

Explorations Vol.4 includes 3 brand-new soundbanks, each with 150 presets designed to push the limits of electronic music creation. From textural world-building and synthetic realism to relentless club energy, this collection offers comprehensive and imaginative sounds for producers, sound designers, and composers alike:

- Openworld Explorationsm - Dynamic sounds for interactive worlds: 150-presets sculpted for game scoring and ambient storytelling. From modular-style pulses and tactile drones to macro-adjustable layers and generative FX.
- Modal Explorations - Material presence reimagined: A celebration of Pigments’ Modal Engine, discover 150 elegant presets across keys, kinetic sequences, breathy hybrids, and bell-like leads. Inspired by avant-pop and experimental electronica.
- Hypertechno Explorations - Crank up the tempo: Energise your productions with a high-octane blend of hard techno, trance, rave, and EDM punch. Discover production-ready bass shots, trancey leads, gated vocals, deep kicks and more.

Designed for Analog Lab (Play, Intro, Pro) & Pigments, Explorations Vol.4 is available for an exclusive price of 29,99€/$ until September 7th.

Phoca PDF

All previous Explorations volumes are also available during the offer period for just 19,99€/$ each:

- Explorations Vol.1 (Beats Explorations, Liquid Explorations, Expressive Explorations)
- Explorations Vol.2 (Ambient Explorations, Psychedelic Explorations, Trap Explorations)
- Explorations Vol.3 (Lofi Explorations, Granular Explorations, Bass Explorations)
