Arturia introduces WaveUser for MicroFreak

Firmware Update V4.0 for the MicroFreak

The evolution of MicroFreak continues. Unlock user wavetables, a brand new sound engine, enhanced sequencer voice controls, and more with a free update for all users. Available to download at Arturia's website.

- New WaveUser Engine: Upload your own custom wavetables and explore them with MicroFreak’s new engine.
- Sequencer Unison & Chord Voices: Unison and Chord modes can now be applied to every MicroFreak note, from sequencer to external notes.
- Faster Oscillator Encoder Settings: You can now select a faster scrolling speed for MicroFreak’s Oscillator encoders in Global Settings.
- 64 New Presets: An inspiring selection of wavetable presets using MicroFreak’s new WaveUser engine, for free.
