Arturia AstroLab Update 1.3

Arturia reveals AstroLab update 1.3, its first major update for the keyboard. Users will be able to get the most out of their AstroLab with a host of new sound making capabilities, presets and enhancements.

AstroLab update 1.3 brings the power of Arturia’s latest software instruments to the AstroLab workflow, allowing users to sync their custom patches and explore a stage-ready selection of 200 new presets and 90 artist tributes. Support has now been added for Acid V, MiniFreak V, Augmented BRASS and Augmented WOODWINDS alongside the completely remodeled engines of Mini V and Wurli V introduced in V Collection X.

Discover 200 of the best presets from the newly supported instruments. Plus 90 new Tribute presets ranging from Tame Impala to Queen, Massive Attack, Talking Heads, Radiohead, Weather Report and more. Arturia have worked hard to improve the performance of AstroLab and the seamlessness of its integration with Analog Lab. Have more confidence on stage and manage your sounds with ease.
