Arturia Augmented BRASS

Discover a new era of cinematic sound, from emotive chamber ensembles to thunderous synth-infused fanfares. Beautifully-recorded brass samples; powerful synth & sampling engines; sweeping musical controls that navigate the territory between them; introducing Augmented BRASS.

Features:

- Dynamic sample library: From full orchestral brass, to chamber horns & trumpets, to wild tape-degraded sustain, the perfect foundations for modern brass sounds.
- Cutting-edge synth engines: Augment familiar brass sounds with synthesis, from virtual analog bass to the new ‘Simpler’ engine for impacts and noise textures.
- Expression & morphing: Make sweeping changes to any sound with the Morph control, or intuitively alter key sonic characteristics with quick-fire macros.
- Deep sound design: Fine-tune your sample & synth layers, and add custom modulation, arpeggiation, effects, and macros in one place.
- Versatile presets: Hundreds of expertly-crafted presets, from familiar brass timbres to experimental sounds, designed for every style.

With user feedback in mind, Arturia has updated the modulation workflow, visual feedback, and added features like individual part panning and keyboard offset - for all Augmented instruments.

To celebrate the launch, new and existing users can purchase Augmented BRASS with limited-time introductory discounts. At the same, Arturia will launch the Cinematic Trio, a bundle of 3 sound banks featuring dynamic film-scoring presets; this bundle will be available at a one-time discounted price for owners of Augmented STRINGS, VOICES, and GRAND PIANO, or free for new buyers of these instruments. Users can login at the website below to unlock their exclusive discounts, available until May 11th.
