

Arturia KeyStep 37 mk2

The KeyStep 37 mk2 is the next evolution of its acclaimed compact controller & sequencer. With a 37-note Slimkey keyboard, generative sequencing tools, and deep connectivity via CV/Gate, MIDI DIN, and USB-C, KeyStep 37 mk2 lets you spark ideas in your DAW, pilot any synth, or patch modular without breaking your flow.

KeyStep 37 mk2 is the go-to compact controller and sequencer with extended playability, enhanced hands-on control, visual feedback, and deep connectivity - an ideal companion for jamming, live performing, and finding new musical ideas with any hybrid setup.

What's New with KeyStep 37 mk2:

- KeyStep 37 mk2 has more physical controls: 5 more keys, 2 additional buttons and 4 knobs for deeper control over parameters and generative

features. This drastically enhances the overall playability of the instrument while staying true to its core functionality.

- Users also benefit from additional visual feedback on this 37-key version with 39 LEDs over the keybed that indicate notes and let you see how your sequences are advancing.
