Arturia MiniFuse 4

Arturia announces the immediate availability of MiniFuse 4, a 4-in/4-out audio & MIDI interface packed with useful & accessible creative features. Completing the MiniFuse family of easy-to-use interfaces, it offers expanded connectivity for musicians & producers looking to streamline their audio creation setups.

Phoca PDF

Capture crystal-clear recordings, refine with pro-grade creative software, and make music happen with a 4-in/4-out interface that ticks all the boxes: best-in-class audio, expanded connectivity, a 5-year warranty, and a world-class suite of software titles for modern music production.

A 110dB dynamic range and industry-best equivalent input noise of -129dB means clear noise-free recording and studio-grade sound quality. Record with up to 4 inputs, connect other gear via MIDI & the USB hub, and customize your ins and outs including dual headphone connections. The stereo virtual Loopback channel lets you record audio from your computer alongside MiniFuse 4’s inputs for a seamless content creation. All the premium software you need to make music your own way, from Ableton Live Lite, to Analog Lab Intro, to Native Instruments’ Guitar Rig 6 LE.

3 powerful, easy, fun interfaces built to empower creativity: from solo guitar recording, to podcasting, to live multi-track performances, there’s a MiniFuse that works for you.
