

Softube Flow Mastering Suite Trial

Audient is adding a Softube plug-in to its Software Bundle ARC. Audient registered customers can now enjoy a one-month trial of Softube Flow Mastering Suite software absolutely free. When becoming a paying subscriber, Audient customers will also receive an exclusive gift of Softube's iconic FET Compressor MkII VST/AU/AAX plug-in. Further augmenting the already significant benefits available to current Audient and EVO owners who register their products, this offer is available immediately for one year.

Flow Mastering Suite offers pro mastering for the busy music producer. Flow enables them to finalise tracks within seconds with signal chains created by professional engineers and access several thousand dollars' worth of mastering-grade tools. Built by pros for music producers, this plug-in makes for lightning-fast workflow using the Smart Flow controls.

For those who continue after the 30-day free trial, FET Compressor MkII comes free and is a meticulous remodel of the most-used analogue compressor, with added features to suit the modern workflow. Softube joins Cubase, Strymon, Sonarworks, GForce, Produce Like A Pro and Spitfire Audio on Audient's Creative Hub ARC, providing a comprehensive range of software and offers from some of the industry's innovators.
