Behringer StageConnect Interface

Behringer just launched SC-U – a compact three-way bridge connecting StageConnect, Ultranet, and USB. Audio can flow in any direction between the systems.

- connect StageConnect gear to your X32/M32 or XAir 18
- use Ultranet gear with your WING console
- add StageConnect gear directly to your computer - no WING needed
- add an extra 32 inputs/outputs of USB audio to your WING
